## Economic Output

UConn has a \$6.9 billion impact on statewide economic output, generated directly from UConn (\$3.5 billion) and through spillover effects on other affected industries (\$1.5 billion) and households (\$1.8 billion). For every dollar spent by UConn, 94 cents in economic output is generated elsewhere in the Connecticut economy, with 43 cents from businesses and 51 cents from households. Moreover, the statewide economic output traced to UConn amounts to approximately \$1,900 per Connecticut resident.

## Value Added to the Economy

The best measure of UConn's contribution to gross state product is the "value added" measure. Value added refers to the difference between the value of output and the cost of raw materials. UConn added \$4.1 billion in value to the Connecticut economy, leaving \$775 million in the hands of businesses and \$1.2 billion in the hands of households. For every dollar UConn spends, 89 cents of value is added to the state economy (with 35 cents going to business owners, and 54 cents to households).

## Economic Impact of UConn's Research

For every research dollar that UConn attracts in externally sponsored research and spends within the state, \$1.01 in economic output is generated elsewhere in the state economy.

UConn's research generates jobs and earnings in the Connecticut economy and supported 1,191 jobs, which includes grant-funded faculty, post-doctoral research staff ("postdocs"), graduate students, and other staff. Added impacts on other businesses (indirect impacts) and other supported jobs (induced impacts), resulted in a total impact of 2,776 jobs throughout the state.
